

Amendments to the Specification

Please replace the paragraph bridging pages 1 and 2 of the present application with the following paragraph:

It is known that light stability of vitamin B6 is improved by addition of boric acid (Vitamins, 22, ~~pp. 138-141~~ pp. 138-141, 1961) or addition of a sugar alcohol (Japanese Patent Unexamined Publication (KOKAI) No. ~~07-20664~~ 07-206664). However, the effect is not satisfactory, and moreover, a problem arises that the use is limited by the addition of boric acid or a sugar alcohol.
